

Grease separator for sink SG 0.5-0.06 "Optima-60"

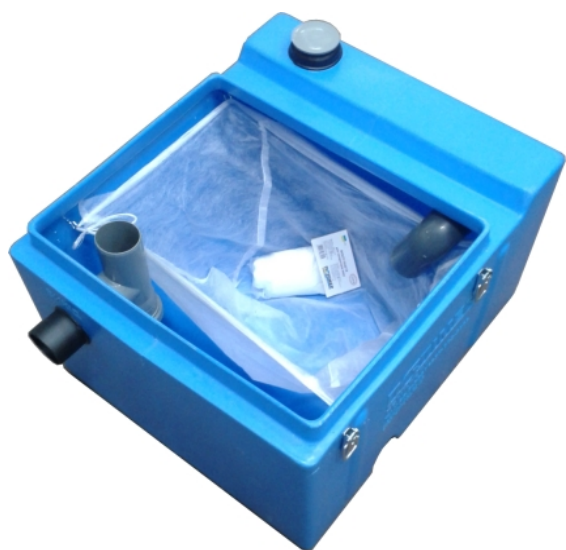

After studying the user feedback, installation and service organizations and adding our many years of experience, we have created a new 60 liters of grease traps for you, which combines all the best wishes and best quality of our fat separators.

Fat removers SG 0.5-0.06 "Optima-60" are manufactured in two models of SG 0.5-0.06 and SG 0.5-0.06-F. Fat feeders SG 0,5-0,06 "Onmuma-60"-F are equipped with filter packages and have fasteners for their installation.

Overall dimensions of "Optima-60" grease collectors:

Length: 480mm; Width: 420mm; Height: 320mm. (540x440x320 - mounting)
Entrance height: 240mm; Output height: 215mm.

Thanks to the additional ribs, the grease trap body has considerably increased.

Unlike analogous models from other manufacturers, the grease trap has a large lid providing easy access to service.

And four metal clamps securely fix the cover and together with the sealant provide the grease trap with the required tightness without using the water shutter.

The grease separators of the "Optima" series are manufactured in series according to the registered TU 29.2-32306957-002: 2009.
